

CANADIAN INSTITUTE FOR THEORETICAL ASTROPHYSICS (CITA)

CITA NATIONAL AND CANADA POSTDOCTORAL FELLOWSHIPS

CITA is a national centre for theoretical astrophysics located at the University of Toronto. As part of its mandate to promote research throughout Canada, the Institute provides partial support for postdoctoral fellows working in theoretical astrophysics or closely related fields at Canadian universities other than the University of Toronto, through the CITA Fellowship Programs.

There are two fellowships being offered: the CITA National Fellowship and the Canada Fellowship. **National Fellows** are *two-year fellowships* hosted entirely at a Canadian university other than the University of Toronto. **Canada Fellows** begin their tenure at a Canadian university outside the University of Toronto for the first two years and the subsequent two years at CITA for a total of a *four-year fellowship*.

If you are interested in a CITA Fellowship or Canada Fellowship, please contact any of the following faculty by email or check department websites for further research projects and details. Apply through the CITA application website and check off the Fellowships you are interested in applying to. You will be required to submit a CV, research statement and arrange for three letters of recommendation.

Please apply online at: <https://icat.cita.utoronto.ca/pdf>

The deadline for applications and all letters of recommendation is **November 11, 2019** for fellowships to start in September 2020.
