

NOHFC Internship: Postdoctoral Level

Thunder Bay, ON

1 Year Contract, Full time

Competition # GEN-19-12

Lakehead University, Photonics Research Group invites applications for a Postdoctoral Level position to work on a project to develop a device for the detection and quantification of trace gases. The project is interdisciplinary in nature and involves researchers from the areas of soil science, agriculture, photonics and spectroscopy. The successful candidate will be expected to carry out research on assigned projects and take a leading role in the development of the device. The position is initially for one year, with the possibility of extension for one more year. For detailed information please visit:
